PROFESSIONAL EXPERIENCE

Special Man Global Solution LTD 04/2023 – Present
Lead Frontend Engineer Lagos, Nigeria

- Served as Lead Frontend Engineer, leading frontend development activities by planning, assigning, and delegating tasks to team members, tracking progress, conducting code reviews, and ensuring timely delivery of high-quality features.
- Mentored and trained interns in **HTML, CSS, JavaScript, React.js and Vue.js** as part of the Special Man Solution Internship Programme (2023–2025), providing hands-on guidance, code reviews, and technical support to accelerate their growth into productive frontend developers.
- Developed and maintained **10+ live web applications** across the **fintech, education, social media, and logistics** sectors, serving **thousands of active users** through responsive, scalable, and high-performance web applications built with modern frontend technologies.
- Collaborated closely with designers, backend engineers, and product stakeholders to translate business requirements into intuitive and maintainable frontend solutions while ensuring adherence to best practices and coding standards.
- Conducted comprehensive code reviews to maintain code quality, improve application performance, enforce frontend best practices, and promote consistency across the development team.

RexChats 01/2026 – 05/2026
Frontend Engineer (Contract) Albania

- Developed and maintained an AI-powered chatbot platform using Next.js and React, enabling automated conversations and customer support across web and mobile interfaces.
- Integrated the chatbot with social media direct messaging platforms to allow businesses manage and respond to customer messages from multiple channels in one system.
- Led collaboration within a small team of 3 engineers, coordinating feature development, system improvements, and timely product releases.
- Designed and built scalable, reusable UI components to support chatbot management, analytics dashboards, and conversation workflows while maintaining a consistent user experience.
- Provided technical guidance and code reviews to junior developers to ensure clean architecture, maintainable code, and best development practices.
